Career Objective

To contribute to the company to the best of my abilities, to learn new skills, to share my knowledge while interacting with others, and to achieve new height.

Education

RGPV University   *August 2018 – July 2023*
Masters in Computer Application
- CGPA: 7.96/10.0

Technical Skill Set

Languages : Html, CSS, JavaScript[ES6+], TypeScript,C++
FrontEnd : React.js, Redux, Redux Toolkit, Material UI, Tailwand, Next.js, Formik , Yup, MicroFrontEnd
Backend : Node.JS [Intermediate]
Build & Deployment : Docker[Intermediate] ,Nginx [Intermediate], Vite, Webpack
Tools & Platforms : Git, GitHub, Postman, Browser DevTools, Gitlab, Jira
Others : UI/UX Design (basic knowledge),Form.io, CORS, JWT, XSS,CSRF

Experience

Junior React Developer   *Nashik, India*
ESDS Software Solutions Ltd   *May 2023 – Present*
- Contributed to 3 core products and the official company website by developing 10+ reusable React.js components with responsive, cross-browser-compatible UIs using Redux, Material UI, and JavaScript.
- Enhanced the company website's user experience by integrating smooth, interactive animations with GSAP, improving visual engagement and navigation flow across devices.
- Built 6 custom Form.io components for the Low Code Magic platform and implemented reusable code that reduced development time by 30%; also integrated 5+ cutting-edge features to keep applications modern.
- Improved app stability and interactivity by 15–25% through error boundaries and drag-and-drop (React Beautiful DND); reviewed 100+ PRs, resolved 20+ UI issues, and mentored 3 new team members in React and project setup.
- Developed reusable React components such as AboutSection, FAQs, Publications, and Report Documents for the MoSPI (Ministry of Statistics and Programme Implementation) website, ensuring clean architecture and modular structure
- Integrated REST APIs for dynamic content rendering in developed components, enabling real-time data updates and seamless user experience across the site.Collaborated with designers and backend developers to implement functional and visually appealing applications, enhancing user experience.
- Aligned with CMMI Level 5 processes and agile methodologies; managed tasks, bugs, and sprint deliverables via JIRA, improving project visibility and team coordination.

Projects

E-Vote Plex
- Built a secure voting platform with React, Redux, and REST APIs, featuring role-based access and results.

Image Converter and Resizer
- Developed a tool with a user-friendly interface for local image conversion and resizing.

My-Portfolio   *MY-PORTFOLIO* ↗
- Created and deployed a responsive portfolio site with project showcases and resume download.

Area Of Interest

- Network Security, Web-Based Security, Penetration Testing, Bug Bounty Programs, DevOps.
