Professional Summary

Frontend Developer with 3 years of experience building scalable React applications for enterprise platforms across banking, education, and cloud infrastructure. Delivered 10+ production-ready reusable components, reduced development time by 30% through innovative solutions, and contributed to features serving 50,000+ users. Specialized in React.js, Redux, component-based architecture, and cross-functional collaboration, and currently contributing a major share of the frontend development for the IIBF 2.0 Transaction Portal.

Experience

React Developer   *Nashik, India*
ESDS Software Solutions Ltd   *May 2023 – Present*

- Led the creation of 10+ reusable, high-performance React.js components for 3 core products (**eNlight360, Low Code Magic, Swayatta 2.0 ERP**) and the official company website, delivering responsive, cross-browser UIs with Redux, Material UI, and JavaScript, driving significant improvements in product functionality and user adoption.
- Transformed **ESDS Corporate Site** user experience by integrating smooth, interactive GSAP animations, significantly boosting visual engagement and navigation efficiency across all devices.
- Pioneered 6 custom Form.io components for **Low Code Magic** platform, implementing reusable code that slashed development time by 30% and introduced 5+ cutting-edge features, modernizing applications and boosting team efficiency.
- Revolutionized app stability and interactivity with a 15–25% uplift for **eNlight360**, spearheaded review of 100+ PRs, resolved 20+ UI issues, and guided 3 new team members in React.
- Developed reusable React components (AboutSection, FAQs, Publications, Report Documents) for **MoSPI Portal**, ensuring clean, modular architecture; integrated REST APIs for real-time data updates, collaborated with designers/backends to enhance UX, and aligned with CMMI Level 5/agile processes via JIRA to manage tasks, bugs, and sprints, boosting project visibility.
- Currently contributing to the **IIBF 2.0 Transaction Portal** as a React Developer, working across Candidate, Exam, Scribe, Vendor, and Result modules, translating complex business workflows into scalable, reusable UI components.
- Designed and implemented a **centralized, reusable Image Cropper** solution integrated across all Transaction Portal workflows for image uploads; enhanced candidate registration, membership handling and exam-related flows.
- Managing **GitLab-based deployments** across Dev, QA, and UAT environments, reviewing PRs, and coordinating with DevOps.

Technical Skill Set

Languages : Html, CSS, JavaScript[ES6+], TypeScript [Intermediate]
FrontEnd : React.js, Redux, Redux Toolkit, Material UI, Tailwand, Next.js, Formik , Yup, MicroFrontEnd
Backend : Node.JS [Intermediate]
Build & Deployment : Docker[Intermediate] ,Nginx [Intermediate], Vite, Webpack
Tools & Platforms : Git, GitHub, Postman, Browser DevTools, Gitlab, Jira
Others : UI/UX Design (basic knowledge),Form.io, CORS, JWT, XSS,CSRF

Education

RGPV University   *August 2018 – July 2023*
Masters in Computer Application

- CGPA: 7.96/10.0
